

Draw a big picture of a worm and write around it all of the things you and your family know about them (adult might need to scribe some facts!).

Then watch the story / listen to the facts and add the ones you remember to your chart. Did you find a lot more facts?

Make a wormery

https://youtu.be/O519RpG1D_k

You need:

A plastic drink bottle (adults cut the neck off but kept for a lid)

Cut up paper

Sand (if you have it to make extra layers)

Soil

Vegetable scraps (good to add on top)

Water

Become a wormologist! Go on a worm hunt in your garden or a safe green space when you go for a walk.

Have a look at page 28-29 from the book and this video to help.

<https://youtu.be/gZHTerOJYMA>

How could you make the worms come to the surface? How will make sure you don't hurt the worms?

Draw a picture of a worm at the top of your page.

- Label the parts you know
- Write a sentence about the worm (can you write more than one?)

Tell me the facts you love the most about worms! My sentence is:

A worm has five pairs of hearts and if it is cold it curls up with other worms to keep warm.

Use our Tools Tales template to make up a new story about a worm.

Draw the pictures and then write your story sentences. Remember! One day, then, next, suddenly and finally are brilliant story words.

Here are my ideas:

Character – Slippery Sue

Setting – Miss Barrett's Garden

Problem – Big black crow wants to eat slippery Sue!

Solution – Miss Barrett saves the day by putting up a scarecrow.

Learn the song 'Wiggly Woo'

<https://youtu.be/s5NEdQ9o4jY>

Can you make up your own actions for the words?

You could wiggle when you hear wiggly!

Surprise your family by making a worm can with Mr Maker:

<https://www.dailymotion.com/video/x3roygx>

OR

Use some recycling to junk model a super long and wiggly worm!

How many words can you think of to describe a worm?

Ask your whole family to help!

Write your words on a piece of paper (ask an adult to help sound it out if there is a tricky one).

Can you beat Miss Barrett and Miss Montgomery by finding more than 10?
