The Rise of the Roman Empire

- This week we have been learning about how the Romans invaded Britain, but it wasn't only Britain that was taken over by the Romans. In fact the Romans conquered many other European countries and parts of Africa to form their mighty empire. Have a look at the timeline pictures attached to find out how the Roman Empire spread from Italy across Europe and to Britain. Can you find out the names of some of the countries that Romans conquered?
- Now using the map template, choose one colour for the Celts and one for the Romans and follow the instructions to colour the maps and show the rise of the Roman Empire.
