

Happy Friday year 2,

Our E-Safety lesson this week is the 'R' rule. This lesson is extremely important for you to understand when using the internet as there is so much information online. How do we know this information is true? Should we trust everything we read and see online? Why/ why not?

Watch 'R' rule video here:

<https://www.childnet.com/resources/video-lessons/the-r-rule>

Choose as many of the following tasks as you like:

- > Choose an animal and write a mixture of true and unreliable facts about them. Test your family and share your facts on Seesaw for your friends to comment and take part.
- > With help from an adult, find 5 websites that have reliable information. Discuss how you know those websites are reliable with your adult then share your findings on Seesaw.
- > Ask an adult about some of the unreliable information they have seen online. Can they think of the craziest things they've read on the internet? How did they know that information was not true?

Stay safe online!
